

VERIFICATION LOG — HubPeople brands live as of 22 July 2026

Retrieval: pages fetched **2026-07-22, ~13:20–13:22 UTC (09:20 EDT)**. **Method:** each public landing page retrieved and its HTML source inspected. No login, account, payment, or member area accessed. Two timestamps are recorded per site where available: (a) *retrieval time* — when this check was run; (b) *page-version date* — the platform's own **meta-version-date** build stamp emitted in the page's HTML, which shows the site was actively maintained as of that date.

Why this log exists: it fixes the state of the network on the date the request-for-comment note goes to Michael O'Sullivan. If any site is taken down or altered afterward, this record — plus the independent captures recommended at the bottom — shows what was live on 22 July 2026.

Notable observations captured this run (22 Jul 2026)

- **Shush was rebuilt today** — its own page-version stamp reads 2026-07-22T04:03:27Z. The platform is actively maintaining these sites now.
- **The clone pattern still holds:** ShagDating advertises "40.1M Rated Members," Shush "40.2M Rated Members" — same template, same ~40M shared pool.
- **Shared UI assets still identical:** the three feature-icon GUIDs ([2d272ead-...](#), [cd8bb808-...](#), [2f246dac-...](#)) appear on both ShagDating and BDSM-Secrets today.
- **The in-network ad is still live:** DirtyMatures still serves the DirtyDoggers cross-promo banner ([crossad-dogging.png](#)) and a BDSM-Secrets banner.
- **DirtyDoggers "Dirty__Place" family confirmed again:** footer links DirtySwingersPlace, DirtyDoggersPlace, DirtyBDSMPPlace, DirtyMaturesPlace (consecutive partner IDs 8037/8039).
- **TheAdultHub footer network still lists** casual.letsmeetup.com, couples-who-play.com, sub-or-dom.com.
- **MeetaMILF** still runs its fake-urgency counter: "35876 members currently online looking for fun right now," and carries a USC §2257 explicit-content disclosure.
